Dear Appfolio Team,

I am a Sophomore Computer Engineering student at the University of California: Santa Barbara, and am applying to your posted position of Software Engineer that was referred to me through one of your previous summer interns, Danish Vaid.

I first found myself drawn to engineering upon participating in the Envision Engineering Program hosted at UC Berkeley, and decided to persue Computer Science at UCSB. During my time at UCSB, I have found a deep passion for Computer Science, Software Engineering, and problem solving. In pursuing my passion I have found great pride in participating in various extracurriculars, namely, the Engineering Student Council, the UCSB Hyperloop team, and Coders SB.

I believe that my leadership and technical skills would sponsor my success and growth in this position. I have attached my resume with contact information and hope to hear from you soon.

Sincerely,

Daniel Gamliel
